

ASBHM

ANNUAL SCIENTIFIC CONFERENCE

# ASBHM2025

**5-7 FEBRUARY 2025**

SOUTHERN CROSS UNIVERSITY  
GOLD COAST, QLD

*Bundjalung and Gumbaynggirr country*

.....  
#asbhm2025

# SCIENTIFIC PROGRAM

# NOTES FOR PRESENTERS

- All presentation slides must be sent to [admin@asbhm.com](mailto:admin@asbhm.com) no later than Monday 3rd February.
- Please do not forget to bring your own lanyard.
- We are a baby and breastfeeding-friendly event.
- We will not be providing printed programs. Instead, please scan the QR code on the front of your nametag to access the program.
- Use the hashtag #ASBHM2025 on any social media posts!
- Any problems during the event? Send us an email.

Thank you to our award sponsor

The logo for PeerJ, featuring the word "PeerJ" in white text on a blue square background.

PeerJ

# NOTES FOR PRESENTERS

- **Venue:** Southern Cross University, Gold Coast Campus - Gold Coast Airport, Terminal Dr, Bilinga QLD 4225
  - Building C: Room 1 (main) and Room 2 on bottom floor
  - Building A: Room 3 and catering (breaks, lunch, ceremonies) on top floor

# INNOVATIVE AND TRANSLATIONAL RESEARCH AT ASBHM2025

ASBHM2025 brings together leading researchers across Australia and internationally to expand our understanding of health psychology and behavioural medicine through innovative and translational research. The ASBHM2025 conference will host three internationally-renowned keynote speakers who will deliver presentations on vital matters in behavioural health and medicine. The conference also has a number of invited symposia from around the country.

This year, our conference covers a range of topics that span both priority areas for research at national and international levels, as well as novel and innovative research areas representing the up-and-coming domains of research in health psychology and behavioural medicine. Topics span nutrition, exercise, physical illness, paediatrics, stress and trauma, women's health, a broad range of protective and lifestyle factors underpinning health and wellbeing, and more.

# ABOUT THE AUSTRALASIAN SOCIETY FOR BEHAVIOURAL MEDICINE

ASBHM functions as a national society, as well as the society that represents the International Society of Behavioural Medicine (ISBM) in Australasia. ASBHM's membership includes individuals specialising in any field of health psychology and behavioural health and medicine, broadly defined. ASBHM has a large student and Early Career Researcher membership that are supported by our more senior members and through our Peers Connect group.

ASBHM aims to encourage and coordinate communication among professionals and academics in health-related disciplines, to stimulate research in health psychology and behavioural medicine in the broadest sense, to assist in the development and communication of guidelines for the implementation of behavioural medicine training and research activities, to serve as a pool of experts who can provide expert knowledge and consultation where required, and to provide opportunities for our members to showcase their research, network, discuss professional views, and contribute to meaningful and constructive debates and discussions.

# PEERS CONNECT

ASBHM Peers Connect is a group formed to support students and early career members of ASBHM. ASBHM Peers Connect is led by Dr Caitlin Fehily (University of Newcastle) and Ms Sabryna Sas (Griffith University) who are the ASBHM Peers Connect Committee Representatives, and Dr Anna Boggiss (The University of Auckland), Hayley Breare (Curtin University), and Dr Prince Atorkey (Australian College of Applied Professions) are the ASBHM Peers Connect Subcommittee members. Together, they work to engage and connect student and early career members of ASBHM, who have an interest in behavioural health and medicine, through promoting research opportunities, mentoring, and education.

Each year, for the ASBHM annual scientific conference, they organise a number of opportunities for Peers Connect members. This includes a fun social activity to allow ASBHM Peers Connect members to meet others and identify common research interests. Throughout the year, they also make contact with ASBHM Peers Connect members to notify them of other workshops and events (outside of the ASBHM conference) that could be of value for their career development, and share job opportunities for early career researchers.

Peers Connect

ANNUAL

# ASBHM2025 KEYNOTE PRESENTERS

## PROFESSOR ANTONIA LYONS

Professor Antonia Lyons holds the Hugh Green Foundation Chair in Addiction Research at the University of Auckland, where she is the Director of the Centre for Addiction Research. Antonia brings a health psychology perspective to her work in multidisciplinary teams. Her research has focused on understanding the social and embodied contexts of behaviours related to health and wellbeing, insight that can be used to help improve outcomes. Much of her work has explored drinking cultures and alcohol consumption at different life stages and in different contexts, with a focus on digital cultures and digital alcohol marketing. Antonia has published over 100 articles and 20 book chapters. She co-authored the text *Health Psychology: A Critical Introduction* and co-edited the books *Youth drinking cultures in a digital world*, *Qualitative Research in Clinical and Health Psychology*, and the *Routledge International Handbook of Critical Issues in Health and Illness*. She is THE co-editor of the Routledge book series *Critical Approaches to Health*.

**Keynote Title: Limbic capitalism, digital marketing and young people's social worlds**

# ASBHM2025 KEYNOTE PRESENTERS

## ASSOCIATE PROFESSOR JAMES KIRBY

James N. Kirby, Ph.D., is an Associate Professor, Clinical Psychologist, and the Co-Director of the Compassionate Mind Research Group at the University of Queensland. He has broad research interests in compassion, but specifically examines factors that facilitate and inhibit compassionate responding. He also examines the clinical effectiveness of compassion focused interventions, specifically in how they help with self-criticism and shame that underpin many depression and anxiety disorders. James also holds a Visiting Fellowship at the Center for Compassion and Altruism Research and Education at Stanford University and is an Honorary Member of the Compassionate Mind Foundation UK. In 2022 he authored *Choose Compassion*, and in 2020 he co-edited *Making an Impact on Mental Health*. He serves as an Associate Editor for two international journals *Mindfulness* and *Psychology & Psychotherapy: Theory, Research & Practice*. He has a new book to be published by Routledge coming out in 2024 called, *The Essentials of Compassion Focused Therapy: A Practice Manual for Clinicians*.

**Keynote Title: Compassion as a Transdiagnostic Target to Prevent and Reduce Mental Health Symptoms and Promote Wellbeing**

# ASBHM2025 KEYNOTE PRESENTERS

## PROFESSOR CHRISTINA POLLARD

Christina Pollard worked as a public servant for almost 40 years before moving to academia to work as Director of the Public Health Advocacy Institute based at Curtin University. A public health dietitian, she calls herself a pracademic, interested in translating research to inform effective practice. She developed, implemented, and evaluated numerous nutrition interventions including the Gofor2&5© fruit and vegetable campaign. She believes that strong policy measures are needed to protect and promote the public health of those who are the most vulnerable in our society. Christina volunteers to make a difference. She's a life member of the Public Health Association of Australia, and a Foodbank WA Board member.

**Keynote Title: Policy and Practice to Improve Public Health in an Unequal World**

# INVITED SYMPOSIA

Wednesday 5th February 2025 | 11:00-12:30

## Advances in Understanding the Structure, Mechanisms, and Consequences of Self-Control for Health and Behaviour

**Convenor:** Jacob Keech | **Chair:** Sabryna Sas |  
**Discussant:** Martin Hagger

Theories of social cognition, which emphasize belief-based constructs as key determinants of behavior, are often used to explain health behavior outcomes. These theories mainly focus on immediate influences on health behavior and often overlook dispositional factors like trait-based constructs. One such construct, trait self-control, has been consistently linked to a broad range of health-related behaviors. Recent research has sought to unify these approaches to health behaviour in integrated models that describe a potential mechanism by which trait self-control relates to health behaviour. Specifically, belief-based constructs from social cognition models are proposed to mediate the relationship between trait self-control and health behaviors. Trait self-control, therefore, serves as a potentially adaptive bias for individuals' expectations with respect to performing health behaviours in future, such that individuals with good self-control tend to adopt approach beliefs and intentions toward health behaviours and, as a consequence, increase their likelihood of performing them. The collection of papers in this symposium highlight innovative research exploring the structure of trait self-control, its role in health behavior, and the mediating effects of social cognition constructs. The symposium will showcase research employing correlational and meta-analytic designs from studies across multiple populations and behaviours.

# INVITED SYMPOSLIA

Wednesday 5th February 2025 | 15:00-16:30

## Living Evidence: Living Reviews, Automation, Living Guidelines, and Learning Health Systems

**Convenor:** Rebecca Hodder | **Chair:** Rebecca Hodder

Living evidence is a super highway to advance the speed of translating the latest research evidence into public health practice, and improve population health outcomes globally. Living systematic reviews, first proposed in 2014 to address the latency between the publication of systematic reviews and new research evidence, have been adopted globally by many leading health and evidence synthesis organisations including the World Health Organisation and Cochrane. They involve continual surveillance for new studies and synthesis and dissemination in a timely manner to enable systematic review findings to remain current. While living systematic reviews can be applied to any research question, there are key criteria that should be met before their consideration. Key enablers in the demonstrated feasibility of living systematic reviews include published guidelines and the exciting advances in publicly available automation and technology enabled tools for the production of systematic reviews generally, advanced especially by the explosion of artificial intelligence. Living systematic reviews additionally underpin a number of other new and significant innovations to improve public health practice and population health outcomes. This includes living guidelines, for which living systematic reviews offer an opportunity to preserve the currency of guidelines for priority health topics and address the years-long latency in the publication of traditional guidelines often out of date on publication. Living evidence is additionally an important pillar of 'learning health systems' recommended by the Institute of Medicine to improve the impact of health services by integrating the best available evidence into healthcare decision making as soon as it is available.

# INVITED SYMPOSLIA

Thursday 6th February 2025 | 9:00-10:30

## Using Open Goals to Promote Health Behaviours

**Convenor:** Christian Swann | **Chair:** Christian Swann

Open goals are an emerging concept in health psychology, underpinned by promising evidence from initial studies in physical activity. They have been used/advocated by elite athletes, government physical activity initiatives, fitness companies, and rehabilitation policies. In contrast to the decades-old assumption that goals must be specific to be effective, open goals are nonspecific and phrased in an exploratory manner (e.g., 'see how many steps I can reach today'). In this symposium, we will provide an overview of open goals and their potential for promoting health behaviours. We will introduce what open goals are and how they differ from other goal setting approaches. A summary of the evidence underpinning open goals will be provided, including proposed outcomes and factors influencing for whom they are most beneficial. We will then present results from a pilot randomised controlled trial of open goals in a 6-week walking program, including psychological and cardiovascular outcomes, to provide insights into mechanisms of promoting and adopting open goals. We will present insights from the use of open goals to promote postnatal mental health via the Food, Move, Sleep (FOMOS) trial - a home-based program that uses e-health strategies together with access to home exercise equipment to deliver evidence-based and consumer-informed information, tips and techniques to support postnatal health in a motivating and practical way. The symposium will conclude with a discussion about next steps for research, policy and practice on the use of open goals to promote health behaviours.

A close-up photograph of a hand holding a blue pencil, poised to write on a crossword puzzle grid. The grid is partially filled with black squares. In the background, a document with text is visible, including the words "United Nations" and "Information Technology".

# INVITED SYMPOSIA

Thursday 6th February 2025 | 12:00-13:30

## Improving Healthy Lifestyle Behaviours Through Cognitive Training Interventions

**Convenor:** Naomi Kakoschke | **Chair:** Poppy Watson | **Discussant:** Poppy Watson

Lifestyle behaviours include both risk (e.g., smoking, substance use) and protective (e.g., healthy eating, physical activity, sleep) behaviours. Modifying lifestyle behaviours such as reducing unhealthy food intake or increasing physical activity levels can help prevent the development of chronic conditions (e.g., cardiovascular disease, type 2 diabetes, mental illness) and promote better health and wellbeing. Nevertheless, long-term engagement in lifestyle behaviour change interventions is often poor. One way to enhance long-term behaviour change is by targeting the cognitive processes underlying unhealthy behaviours. Some of these critical cognitive processes include aspects of impulsivity, namely, future discounting and inhibitory control, as well as compulsivity. Cognitive training interventions represent a promising strategy for modifying these processes rather than directly targeting health behaviours. This symposium will present research on the development and effectiveness of cognitive interventions for improving eating behaviours, substance use, and cigarette smoking. These interventions include those targeting improved inhibitory control (i.e., Go/No-Go and Stop-Signal training), as well as reduced future discounting (i.e., Episodic Future Thinking) and compulsivity (i.e., acceptance-based mindfulness). The symposium will conclude with a discussion.

# INVITED SYMPOSIUM

Friday 7th February 2025 | 12:00-13:30

## Perinatal Weight Stigma: Voices from Women, Healthcare, and Policy

**Convenor:** Briony Hill | **Chair:** Briony Hill

Weight stigma harms health. It impacts 3.3 million Australian reproductive-age women annually who encounter up to three stigmatising events daily. It disrupts cortisol production and induces a physiological stress response. It has substantial impacts on mental and physical health including depression, anxiety, and disordered eating. Perinatal women who experience weight stigma report stigmatising encounters at almost every healthcare visit, leading to decreased quality and lower uptake of maternity healthcare and intergenerational consequences. This symposium will unpack perinatal weight stigma from the perspectives of those who experience it, the healthcare context where it occurs, and what needs to change to address it from a top-down approach. To begin, a first-hand, lived experience account of the experiences and consequences of weight stigma in the perinatal period will be shared. Second, summing up 15 years of research investigating women's weight stigma, the importance of psychosocial factors and resilience in battling the effects of weight stigma will be explicated. Third, to understand the contextual factors influencing perinatal weight stigma, maternity care providers' attitudes, perceptions and beliefs towards larger-bodied pregnancies will be shared. Fourth, to combat implicit and explicit negative stigmatising attitudes, we pose and answer the question, "what does weight-inclusive maternity care look like?" Finally, to address top down, structural drivers of weight stigma, an overview of what needs to change to make the policies informing care provision less stigmatising will be provided.

# WORKSHOP

Wednesday 5th February 2025 | 13:30-15:00

## Exploring Opportunities for Ambient Technology in Healthcare

**Facilitator:** A/Professor Simon Egerton

This workshop explores the potential of ambient technology in healthcare. Ambient technology, characterised by its unobtrusive and pervasive nature, offers innovative solutions for enhancing patient care, improving health outcomes, and streamlining healthcare processes.

This workshop will explore:

- **Current Applications:** An overview of existing ambient technologies in healthcare, including smart sensors, wearable devices, and AI-driven health monitoring systems.
- **Future Prospects:** Discussion on emerging trends and future opportunities for ambient technology to address challenges in healthcare delivery, patient engagement, and chronic disease management.
- **Interactive Session:** Hands-on activities and collaborative discussions to brainstorm new ideas and applications for ambient technology in various healthcare settings.

You're invited to bring any questions or challenges you have about engaging with ambient technology in your research. Let's explore solutions together!

**Cost:** Free for all Student Delegates, and \$20 AUD for Professional Delegates.

# SOCIAL EVENTS AT ASBHM2025

**Conference dinner @ Greenmount Surf Club  
Thursday 6th February - 6:00pm-late**

---

The ASBHM2025 conference dinner will be held at the Greenmount Surf Club, situated on the beach at the very southern end of the Gold Coast. It is renowned for being the locals' choice for family-friendly dining. They provide a perfect backdrop with stunning sunset views, where the rhythmic sounds of the surf set the tone for an unforgettable meal.

Your dinner ticket includes a two-course meal (entree and main), which you will choose from three options. All dietary requirements can be catered for, but please ensure you advise us when you buy your ticket.

**Cost:** \$69 AUD per person

A photograph showing the lower legs and feet of several people sitting on a grassy lawn. In the center-left of the image, there is a black bowl with three concentric yellow circles on its top surface. The background is a green lawn.

# SOCIAL EVENTS AT ASBHM2025

**Peers Connect Social Event  
Wednesday 5th February - 5:45pm-late**

---

On the evening of the first day of ASBHM2025, all Peers Connect members are invited to attend the social event. This year, we will be having some fun and playing a few friendly games of barefoot bowls at the Cooly Bowls Club located in Coolangatta. This will be followed by a casual dinner (and beverages) at the same venue.

We have organised for a bus to transport attendees from the conference venue to Cooly Bowls Club and back. Tickets are limited to 24 only!

**Cost:** \$25 AUD per person (+ any additional food and drink purchases on the night)

# ASBHM LEADERSHIP PANEL

**Panel Members:** Professor Barbara Mullan,  
Professor Kerry Sherman, A/Professor Carina  
Chan & Professor Antonia Lyons

---

**Thursday 6th February 2025 | 13:30-  
15:30**

This panel will explore the key challenges and opportunities facing academic leaders in today's evolving higher education landscape.

Our panellists, including past ASBHM Presidents and the current ISBM President, will share their insights on effective leadership strategies for fostering academic excellence, promoting diversity and inclusion, and navigating the complexities of institutional change. The discussions will focus on teaching excellence, research impact, governance and service within academia.

Our panellists will be taking questions from the audience, so please come with some questions prepared!

**Cost:** Free

# ASBHM2025 SOCIAL EVENTS WHATSAPP GROUP

**Do you want to keep up to date with all the \*unofficial\* social events at ASBHM2025?**

This year we have created a WhatsApp group for conference delegates. The group is designed to facilitate networking and social opportunities outside of those that have been officially organised.

Join the WhatsApp group by scanning the QR code below.

# PROGRAM OVERVIEW

## DAY 1 - WED 5TH FEBRUARY

	ROOM 1 (MAIN)	ROOM 2	ROOM 3
9:00-9:45	Registration		
9:45-10:00	Welcome Address <i>ASBHM President - Caitlin Liddelow</i>		
10:00-11:00	Keynote Address Policy and Practice to Improve Public Health in an Unequal World  <i>Professor Christina Pollard, Curtin University</i>		
11:00-12:30	Invited Symposium <i>Advances in Understanding the Structure, Mechanisms, and Consequences of Self-Control for Health and Behaviour</i>	Presentations <i>Nutrition and Eating Behaviours</i>	Presentations <i>Health Systems and Policy</i>
12:30-13:30	Lunch		
13:30-15:00	Workshop Exploring Opportunities for Ambient Technology in Healthcare  <i>A/Professor Simon Egerton, La Trobe University</i>		
15:00-16:30	Invited Symposium <i>Living Evidence: Living Reviews, Automation, Living Guidelines, and Learning Health Systems</i>	Presentations <i>Social Influences on Health</i>	Presentations <i>Mental Health and Wellbeing</i>
16:30-17:30	Welcome Event <i>Canapes and beverages - all welcome</i>		
17:30	End of Day One		
17:45 till late	Peers Connect Social Event <i>Cooly Barefoot Bowls</i>  <i>Tickets must be purchased in advance to attend - limited to 24 people. Please meet in the foyer of the building at 5:40pm to catch the private bus</i>		

# PROGRAM OVERVIEW

## DAY 2 - THURS 6TH FEBRUARY

	ROOM 1 (MAIN)	ROOM 2	ROOM 3
7:30-8:30	ASBHM Executive Committee Breakfast <i>The Green Room</i>		
8:30-9:00	Registration Open		
9:00-10:30	Invited Symposium <i>Using Open Goals to Promote Health Behaviours</i>	Presentations <i>Cognitive and Behavioural Mechanisms</i>	Presentations <i>Psychosocial Aspects of Health</i>
10:30-11:00	Morning Tea		
11:00-12:00	Keynote Address Limbic capitalism, digital marketing and young people's social worlds  <i>Professor Antonia Lyons, University of Auckland</i>		
12:00-13:30	Invited Symposium <i>Improving Healthy Lifestyle Behaviours Through Cognitive Training Interventions</i>	Presentations <i>Digital and Social Media in Health</i>	Presentations <i>Intervention Design and Evaluation</i>
13:30-15:30	Lunch + Leadership in Academia Panel <i>Professor Barbara Mullan, Professor Kerry Sherman, A/Professor Carina Chan &amp; Professor Antonia Lyons</i>  <u><i>The panel will begin at 14:00 - please feel free to bring your lunch</i></u>		
15:30-16:30	Presentations <i>Health Promotion and Initiatives</i>	Presentations <i>Cross-Cultural and Global Health Perspectives</i>	Presentations <i>Aging and Health</i>
16:30	End of Day Two		
18:00 till late	Conference Dinner <i>Greenmount Surf Club</i>  <i>Tickets must be purchased in advance to attend</i>		

# PROGRAM OVERVIEW

## DAY 3 - FRI 7TH FEBRUARY

	ROOM 1 (MAIN)	ROOM 2	ROOM 3
8:30-9:00	Registration Open		
9:00-10:30	Presentations <i>Chronic Illness and Management</i>	Presentations <i>Behaviour Change and Intervention Strategies</i>	N/A
10:30-11:30	Keynote Address Compassion as a Transdiagnostic Target to Prevent and Reduce Mental Health Symptoms and Promote Wellbeing  <i>AI/Professor James Kirby, University of Queensland</i>		
11:30-12:00	Morning Tea		
12:00-13:30	Invited Symposium <i>Perinatal Weight Stigma: Voices from Women, Healthcare, and Policy</i>	Presentations <i>Health Literacy, Education and Communication</i>	Presentations <i>Emerging Technologies in Health</i>
13:30-14:30	Lunch + Annual General Meeting  <i><u>All welcome to attend</u></i>		
14:30-16:00	Presentations <i>Health Indicators and Outcomes</i>	Presentations <i>Community Health and Outreach</i>	Presentations <i>Child and Adolescent Health</i>
16:00-17:00	Closing Event + Awards <i>Canapes and beverages - all welcome</i>		
17:00	End of ASBHM2025!		

# **PROGRAM DAY-BY-DAY BREAKDOWN**

*\*Schedule is subject to change*

# DAY 1 – WED 5TH FEBRUARY

	ROOM 1 (MAIN)	ROOM 2	ROOM 3
